4	Adult Contribution to Fisheries, Spawning Grounds and Hatcheries: Magic Valley Hatchery - Summer Steelhead
5	Annual Operating Expenses: Magic Valley Hatchery - Summer Steelhead

6 Annual Operating Expenses - Magic Valley Hatchery

Executive Summary

This report presents the findings of the independent audit of the Magic Valley Hatchery - Summer Steelhead program. The hatchery is located on the Snake River, approximately 7 miles northwest of the town of Filer in the Snake River Canyon in Idaho. The hatchery is used for egg and rearing of summer steelhead.

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

Background

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) Strategy for Salmon and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

The Audit Process

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

Magic Valley Hatchery - Summer Steelhead Results

The Magic Valley facility includes 32 concrete raceways, 20 start tanks and upwelling incubators. Magic Valley Hatchery was constructed in 1987 by the U.S. Army Corps of Engineers as part of the Lower Snake River Compensation Program(LSRCP) - a program to mitigate for anadromous fishery losses caused by the four federal dams constructed on the lower Snake River.

The Magic Valley Hatchery was in general compliance with most of the performance measures. In the area of program objectives, the hatchery needed to improve its fry-to-smolt survival and adult returns. The audit found that the hatchery was not in compliance with the temperature criteria, water quality monitoring criteria, alarm requirements, doubling screening requirements, predation control facilities, and feed handling facilities. It was also not in compliance with the screen approach criteria, adult holding facilities, turbidity criteria, and pathology-free water criteria, which are all facilities requirements. The hatchery also slightly exceeded its density criteria for rearing, needed to develop specific incubation and rearing standards for the IHOT Operations Plan, and needed to develop a smoltification goal and monitoring program, and to construct acclimation ponds in the Salmon River subbasin. In the compliance area for fish health policy, the hatchery needed to obtain copies of egg and fish transfer/release records. The hatchery did not have an approved Genetics Monitoring and Evaluation Program in place.

The specific areas in which the Magic Valley Hatchery - Summer Steelhead program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Complete bird netting around raceways
- Construct acclimation ponds in the Salmon River subbasin
- Develop approved genetics monitoring and evaluation program
- Develop logger for alarms
- Develop smoltification goals and monitoring program
- Develop specific incubation standards for IHOT Operations Plan
- Develop specific rearing standards for early rearing and rearing for IHOT Operations

Plan

- Avoid leaving buckets of feed exposed to the light or heat
- Document adult returns
- Follow IHOT standards for cab disinfection
- Improve communications between evaluation biologists and hatchery staff
- Improve fry-to-smolt survival
- Modify hatchery operations or modify rearing density standard to eliminate densities greater than criteria
- Monitor oxygen concentration during hauling
- Monitor TGP
- Obtain copies of egg and fish transfer/release records
- Perform IHOT QA/QC feed tests
- Provide additional screen panels and install double screens
- Provide rearing in the Salmon river subbasin
- Review compliance with manufacturers recommendation for feed storage
- Run analysis for contaminants
- Run analysis for missing water chemistry parameters
- Use chiller to meet IHOT temperature criteria
- Wear protective garments when handling eggs or culture water

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

Facility Description

Name: Magic Valley Hatchery
Stock/Species: Summer Steelhead
Operating Agency: Idaho Department of Fish and Game
Funding Agency: Lower Snake River Compensation Program (LSRCP)
Location: Located on the Snake River, approximately 7 miles northwest of the town of Filer in the Snake River Canyon. The elevation of the hatchery is 3,000 feet above sea level.
Address: Idaho Department of Fish and Game
Magic Valley Hatchery
Route 1
Filer, ID 83328

Hatchery Manager: Mr. Bob Moore
Phone: (208) 326-3230
Fax:

Purpose: Magic Valley Hatchery was constructed in 1987 by the U.S. Army Corps of Engineers as part of the LSRCP - a program to mitigate for anadromous fishery losses caused by the four federal dams constructed on the lower Snake River. The LSRCP mitigation goal is to return 11,600 adult steelhead above Lower Granite Dam.
Production Goal: Summer Steelhead

Produce 2.0 million ÒAÓ and ÒBÓ strain smolts (400,000 lb) for

Water Supply:

release into the Salmon River and its tributaries
The hatchery is located on the south shore of the Snake River while the Crystal Springs water supply is on the north side. Water is delivered to the hatchery by gravity flow at an average flow rate of 125 cfs.

Facilities:

Adult Holding:	none
Incubation:	40 upwelling units
Early Rearing:	20 starter tanks - 429 cf each
Raceways:	32 raceways - 6,158 cf each
Rearing Ponds:	none
Satellite Facilities:	none

Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).

The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

- Section 1 Performance Measures for General Information and Expenditure
Information (PMs General 1-2)
- Section 2 Performance Measures for Program Objectives (PMs 1-4)

Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit. This process consisted of research and onsite visits. The site visit at the Magic Valley Hatchery was conducted on September 11, 1996.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.
3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.

4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

Compliance Status of Magic Valley Hatchery - Summer Steelhead

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (✓) indicates that the specific life stage is held at this facility.

This section documents the compliance status of the Magic Valley Hatchery - Summer Steelhead program. Each performance measure is presented in a table taken from the audit form (Table 2).

The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

Table 1 Summary Program Information for Magic Valley Hatchery - Summer Steelhead (ÒÁÓ Run)

Component	Location of Adult Holding, Spawning, Incubation, and Rearing

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#1	Are the hatchery programs outlined in a subbasin management plan?		4			Columbia Basin System Planning Production Plan and Lower Snake River Compensation Program (LSRCP)	
#2	Is the hatchery operating under a current hatchery operational plan? Is it understood by staff? Is it being followed?		4 4 4			IHOT Operations Plan and Hatchery Operations & Maintenance Manual	
#3	Is a hatchery monitoring and evaluation plan in place? Do you have a written monitoring and evaluation plan?		4				
#4a	Adult contribution to fisheries, spawning grounds, and hatchery				4		Document adult contribution
#4b	Adult pre-spawning survival as compared with established goal	4				No broodstock at this hatchery	

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#4c	Egg-take as compared with established hatchery goal	4				No spawning at this hatchery	
#4d	Green-egg to eyed-egg survival as compared with established goal	4				No green-egg incubation at this hatchery	
#4e	Eyed-egg to fry survival as compared with established goal		4			In compliance 5 out of last 5 years for both A and B runs	
#4f	Fry to smolt survival as compared with established goal ÒAÓ Run ÒBÓ Run		4		4	In compliance 5 out of last 5 years In compliance 1 out of last 5 years	Improve fry-to-smolt survival
#4g	Production as compared with established goal		4			In compliance 3 out of last 3 years for both stocks.	
#4h	Percent survival (smolt to adult) as compared with established goal				4	In compliance 0 out of last 3 years; both A and B Runs	Improve adult returns and better document adult returns
#4i	Number of eggs, fry, fingerlings, smolts, and/or adults to meet basinwide needs	4					

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#5a	Temperature						
	Does your water temperature meet the criteria for spawning?	4				No spawning at this hatchery	
	Does your water temperature meet the criteria for incubation?				4	Review of records/Discussion. Over criteria by 3 degrees. Chilling is available but the hatchery doesn't feel it is worth while in this situation to reduce the water temperature by only 3 degrees.	Use chiller to meet IHOT temperature criteria
	Does your water temperature meet the criteria for rearing?		4				
#5b	Dissolved gases						
	Is the oxygen level near saturation?		4			Review of records/Discussion.	
	Is the dissolved nitrogen level less than saturation?			4		Site inspection; they have equipped system with degassing chambers because of concern over gas supersaturation. Fix seems to work.	Monitor TGP

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#5c	Chemistry Ammonia (un-ionized) Carbon Dioxide Chlorine pH Copper Hydrogen Sulfide Iron Zinc		 4 4 4 4	 4 4 4		 No data No data Review of records/Discussion Copper 0.01 mg/l. no risk perceived No data	 Run analysis Run analysis Run analysis to confirm Run analysis
#5d	Turbidity Does your turbidity meet the criteria?		 4			 Review of records/Discussion	
#5e	Alkalinity and hardness Does your alkalinity and hardness meet the criteria?		 4			 Review of records/Discussion	
#5f	Nitrite Does your nitrite meet the criteria?		 4			 Review of records/Discussion

#5h	Pathogens What portions of the hatchery have disease-free water? Adult holding Incubation Early rearing Rearing Others	4	4 4 4			No adults at this hatchery Discussion Discussion Discussion	

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#6	Alarm Systems						
	Do the following areas have alarms?						
	Intake		4			Inspection of facilities/ Discussion	
	Large rearing ponds and adult holding ponds	4				Inspection of facilities/ Discussion	
	Raceway headboxes and rearing ponds		4			Inspection of facilities/ Discussion	
	Incubation facilities		4			Inspection of facilities/ Discussion	
	Quarantine areas and facilities	4				Inspection of facilities/ Discussion	
	Water treatment systems	4				Inspection of facilities/ Discussion	
	Security				4	Inspection of facilities/ Discussion	Install security alarms
	Are there outside systems and buzzers in on-site residences?		4			Discussion	
	Are water flow alarms checked daily?		4			Review of records /Discussion	
	Are all other alarms checked weekly?		4			Review of records /Discussion	
	Is there a log of alarms for emergencies, tests, and maintenance requirements?				4	Review of records/Discussion	Develop system to log alarms
	Are telephone pagers used?				4	Present but not used	Not important

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#7	Adult collection and holding facilities						
	Do you meet the adult holding criteria?	4				no adults at this hatchery	
#8	Incubation facilities						
	Type 1: <u>Upwelling Jar</u>						
	Do you have an adequate number of units for the overall program?		4			Inspection of facilities/Discussion	
	Type 2: <u>N/A</u>						
	Do you have an adequate number of units for the overall program?	4					

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#9	Rearing facilities Type 1: <u>Concrete Vats</u> Do you have an adequate number of units for the overall program? Type 2: <u>Concrete Raceways</u> Do you have an adequate number of units for the overall program? Type 3: <u>N/A</u> Do you have an adequate number of units for the overall program?		4			Inspection of facilities/Discussion. Inspection of facilities/Discussion	

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#10	Screening facilities Do you meet the approach velocity criteria: Are the fish screens regularly cleaned? Does Screen Mesh (openings) meet current opening criteria? Are rearing containers double screened for fish that should not be released to adjacent water?	 4 4 4			 4	Spring supply; no indigenous fish Slots are available, but not enough screens	 Provide additional screen panels and install double screens.
#11	Predator control facilities Are your predation control facilities effective?				 4	Discussion. Bird screen over the top of all the raceways but sides are open.	Complete bird netting around raceways

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No	
#12	<p>Food storage facilities and quality control</p> <p>Does the storage of dry/semi-moist/moist foods (dry<12%; semi-moist 12-20%; moist >20% moisture) follow food manufacturer's recommendations?</p> <p>Does a regional quality control officer oversee production procedures and monitor:</p> <p>Verification by feed manufacturer that ingredients meet specifications?</p> <p>Ensure feed does not contain unwanted drugs or other additives?</p> <p>Analyze ingredients contained in the final food product to ensure that feed specifications have been met?</p> <p>Are the foods stored and handled according to the following criteria?</p> <p>Moist pellets should not exceed 10 °F at point of delivery</p>					

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
				4		Discussion; believe they are okay but have no documentation.	Review compliance with manufacturers recommendation for feed storage
					4	Discussion.	Perform IHOT QA/QC feed tests
					4		Perform IHOT QA/QC feed tests
					4		Perform IHOT QA/QC feed tests
			4				

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#13	Release facilities Do the release facilities ensure that fish are not subjected to adverse conditions?		4				
#14	Pollution abatement facilities Do the pollution abatement facilities meet all federal and state regulations (or good engineering practice)? Are pollution abatement facilities operated correctly?		4 4			Discussion and inspection of facilities. Ponds are unlined and originally not intended to be cleaned. DEQ may require cleaning	
#15	Transportation facilities Are the transport systems adequate to meet IHOT performance measures for transportation practices?		4			Discussion	

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#16	Broodstock selection practices						
	Is the donor selection process document attached?	4				Existing program; does not apply	
	Was the donor selection outline followed in selecting the hatchery broodstock?	4				Existing program; does not apply	
	Go to PM #40 in Genetics						
#17	Spawning practices						
	Were the appropriate number of spawners, male/female ratios, and fertilization protocols used?	4				Review of records/Discussion	
	Go to PM #42 in Genetics Section						

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#18	Incubation practices Are specific incubation standards listed in the hatchery operations plan? Are incubation practices written? Incubation Type 1: <u>Upwellers</u> (See PM #8) Do you meet the loading and flow criteria? Incubation Type 2: <u>N/A</u> (See PM #8) Do you meet the loading and flow criteria?		4 4 4			Not in IHOT Operations Plan but in hatchery plan Discussion	Develop specific incubation standards for IHOT Operations Plan

Table 2 Magic Valley Hatchery - Summer Steelhead Compliance With Performance Measures

		N/A	Yes	?	No		
#19	Rearing practices						
	Are specific rearing standards listed in the hatchery operations plan?		4			Not in IHOT Operations Plan but in hatchery plan	Develop specific rearing standards for IHOT Operations Plan
	Are rearing practices written?		4			Review of rearing standards, O&M	
	Rearing Unit Type 1: <u>Linear Vats</u> (see PM #9)				4	Discussion; slightly over criteria, but probably not significant	Develop specific early rearing standards for IHOT Operations Plan
	Do you meet the density and DI criteria?		4				
	Do you meet the Loading and FI criteria?		4				
	Rearing Unit Type 2: <u>Raceway top section</u> (see PM #9)						
	Do you meet the density and DI criteria?		4				
	Do you meet the Loading and FI criteria?		4				
	Rearing Unit Type 3: <u>Raceways, Full</u> (see PM #9)				4	Slightly over criteria	Modify operations or modify rearing criteria. See PM #19
	Do you meet the density and DI criteria?						
	Do you meet the Loading and FI criteria?		4

Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

Remedial Actions at Magic Valley Hatchery - Summer Steelhead

This section presents the corrective actions required to bring the Magic Valley Hatchery - Summer Steelhead program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ($\pm 40\%$).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

**Table 3. Remedial Actions Required at Magic Valley Hatchery - Summer
Steelhead**

Remedial Action Required	Cost	PMS ¹
Type 1 - Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery		
Improve adult returns	----	4h
Install security alarms and use telephone pagers	----	6
Insulate bulk storage facilities	----	12
Type 2 - Remedial actions requiring changes in agency policies or procedures		
Document adult returns	----	4h
Use chiller to meet IHOT temperature criteria	----	5a
Review compliance with manufacturers recommendation for feed storage	----	
Perform IHOT QA/QC feed tests	----	12
Do not leave buckets of feed exposed to the light or heat	----	12
Develop specific incubation standards for IHOT Operations Plan	----	18
Develop specific rearing standards for early rearing and rearing for IHOT Operations Plan	----	19
Modify hatchery operations or modify rearing density standard to eliminate densities greater than criteria	----	19
Develop smoltification goals and monitoring program	----	22a1
Follow IHOT standards for cab disinfection	----	23
Wear protective garments when handling eggs or culture water	----	23
Improve communications between evaluation biologists and hatchery staff	----	24
Obtain copies of egg and fish transfer/release records	----	31
Develop approved genetics monitoring and evaluation program	----	43

Remedial Action Required	Cost	PMS ²
Type 3 - Remedial actions requiring changes in monitoring coverage or interval		
Monitor TGP	----	5b
Run analysis for missing water chemistry parameters	----	5c
Run analysis for contaminants	----	5g
Monitor oxygen concentration during hauling	----	23
Type 4 - Remedial actions requiring significant capital expenditures		
Develop logger for alarms	\$1000	6
Provide additional screen panels and install double screens	\$7000	10
Complete bird netting around raceways	\$7000	11
Construct acclimation ponds in the Salmon River subbasin		22b
3 acclimation ponds @ 1,000,000 per site	\$3,000,000	
	0	
Type 5 - Remedial actions that may require significant capital expenditures but are not clearly definable at this time		
Improve fry-to-smolt survival	----	4f
Provide rearing in the Salmon River subbasin	----	22b

Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the Magic Valley Hatchery - Summer Steelhead contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

**Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries:
Magic Valley Hatchery - Summer Steelhead (A Run and B Run Combined)**

Year	Fisheries (Broodyear)	Spawning Grounds (Broodyear)	Hatchery¹ (Broodyear)	Total Combined Contribution (Broodyear)	Smolt to Adult Survival (percent)
1981					
1982					

Data obtained from Missing Production Groups Annual Report or from the Regional Mark Information System database.

Total combined adult contribution; presented when it is not possible to subdivide the contribution into fisheries, spawning grounds, and hatchery contributions.

1991					
1992					

Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the Magic Valley Hatchery - Summer Steelhead program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Tables 5a - 5e).

Table 5. Annual Operating Expenses: Magic Valley Hatchery - Summer Steelhead

Hatchery	1994	1995	1996
